Pre-development activities for the construction of the new home of Triumph Baptist Church have begun. Over the next few months, meetings between the SPG3 Architects, The Delta Organization and the leaders of Triumph Baptist Church will define the detail specifications for the new church to be built.

Construction of this facility will be handled on a Fastrack basis with construction starting in Winter 2004 with completion scheduled for Winter 2005. This 52,000 SF project will consist of a new church sanctuary, administrative offices, and educational facilities. This project is the second consecutive Triumph Baptist Church project awarded to Delta.
